

BARB 2010 Service

BARB Reference Manual

**Table of Contents
Version 1.3**

Table of Contents

1. ESTABLISHMENT SURVEY

- 1.1 Introduction**
- 1.2 Establishment Survey Sample Design**
- 1.3 Establishment Survey Fieldwork**
- 1.4 Establishment Survey Editing Procedures**
- 1.5 Establishment Survey Weighting**

2. UNIVERSE CALCULATIONS

- 2.1 Introduction**
- 2.2 Calculation of Static Variables**
- 2.3 Calculation of Dynamic Variables**

3. PANEL SAMPLE DESIGN AND CONTROL

- 3.1 Introduction**
- 3.2 Sample Design**
- 3.3 Panel Controls**

4. PANEL RECRUITMENT

- 4.1 Overview of Set-Up Recruitment**
- 4.2 Selection from Multiple Initial Recruits During Set-up**
- 4.3 Ongoing Maintenance Recruitment**

5. METER FUNCTIONALITY

- 5.1 Introduction**
- 5.2 The Kantar 5000-Series Modular PeopleMeter**
- 5.3 Interaction with Panel Members and Guests**
- 5.4 Channel Identification Techniques**
- 5.5 Other Features of the Meter**

6. QUALITY CONTROL

- 6.1 Introduction**
 - 6.2 Input Quality Control**
 - 6.3 Output Quality Control**
-

7. CALCULATION METHODOLOGY

- 7.1 Introduction**
 - 7.2 Calculation of Weights**
 - 7.3 Calculating Minute Audiences**
 - 7.4 Sub-Group Factoring**
 - 7.5 Combined Audiences**
 - 7.6 Universes for Non-Standard Audiences**
 - 7.7 Channels and Stations**
 - 7.8 Network Panel 50 Reporting**
 - 7.9 BBC Area Reporting**
 - 7.10 Time Period and Transmission Audiences**
 - 7.11 Calculation of a Rating Over Time**
 - 7.12 Reach**
 - 7.13 Reach and Frequency Calculations**
-
- A Appendix A – Rim-Weighting Configurations and Reporting Category Controls**
 - B Appendix B – Reach and Frequency Algorithm and Examples**
 - C Appendix C – BARB Datafiles and Worked Examples**
 - D Appendix D – Macro Region Definitions**
 - E Appendix E – Reach and Frequency Algorithm and Examples**
 - F Appendix F – Interpretation of Calculation Conventions**
-
