

The background of the entire page is a photograph of two children, a boy and a girl, looking intently at a screen. The image has a blue color cast. Overlaid on the image is a white network diagram consisting of several circular nodes of varying sizes connected by thin white lines. Some of these nodes are semi-transparent circles that appear to be zoomed-in views of the children's faces.

Appendix E: Number of televisions in the household	
Appendix F: Rounding	
Appendix G: Sample bases for the tables	
Appendix H: Multiple households at issued addresses	
Appendix I: Weighting	
Appendix J: The Questionnaire (December 2016)	

This work was carried out in accordance with the requirements of the international quality standard for market research, ISO 20252:2006 and with the Ipsos MORI Terms and Conditions which can be found at <http://www.ipsos-mori.com/terms>

This reports contains the weighted data results from the Establishment survey for the period October - December 2016

Data is presented at different levels

- Household

- Set

- Individual

Accordingly; bases do vary.

Appendices contain details of the survey objectives, sample design, response rates and standard definitions. A copy of the questionnaire is also included at the end of the report.

Appendix A

Survey objectives

The Establishment Survey has three major purposes:

1. To establish for households and individuals in each ITV area and BBC region:
 - a) television ownership
 - b) television reception
 - c) ownership of television related equipment
 - d) detailed demographic information.
2. To obtain targets for the results of the survey for various interlaced demographic and television reception characteristics to which the BARB panel, when selected, should conform. These targets are used as weekly panel controls. They include:
 - Age of housewife
 - Size of household
 - Presence of children
 - Social grade
 - Age
 - Sex
 - Working status (adults)
 - Terminal age of education
 - Number of sets
 - Set characteristics
 - Ownership of TV related equipment
3. To provide a master sample of households of known characteristics from which the panels are maintained. Selection is based on geographic location, as well as the controls listed above, so that for each BARB region the various strata are correctly represented.

Appendix B

The sample

The Establishment Survey is selected as an annual sample, which is then divided into twelve monthly replicates. The design is such that the monthly samples will support Network reporting and the quarterly samples will support full regional reporting. This appendix details the sampling procedures used.

POPULATION DEFINITIONS AND GEOGRAPHY

The Establishment survey is designed to be representative of all permanent residents in private households in the UK. This excludes about 3% of individuals who are resident in non-private households.

The population is divided into ITV reception areas and BBC editorial regions. These are defined by BARB in terms of postal geography.

BBC editorial regions and ITV reception areas are both non-overlapping geographically defined regions. There are 13 BBC editorial regions and 14 ITV reception areas.

When ITV areas and BBC regions are overlaid, a total of 32 mutually exclusive BBC/ITV area segments are generated.

A number of these are then further subdivided based on geographical considerations and a total of 48 BBC/ITV segments are used for sampling purposes.

SAMPLE STRATIFICATION

The sample is stratified using the following variables:

- BBC/ITV Segment
- Low Population Density (Yes/No)
- Cable areas
- five Reception areas
- DTT area stratifier (low/medium/high)
- Ethnicity
- Geodemographic

BBC/ITV segment is the primary stratification. Sample requirements within the 48 BBC/ITV segments are calculated with reference to ITV area panel sizes. The total annual sample size is 56,508 which is split into four quarterly replicates.

SAMPLE SELECTION

The sample selection within BBC/ITV segment entails the systematic selection of output areas followed by the selection of addresses within output area.

a) Selection of output areas

There are two procedures for the selection of output areas based on density of population. The method covering the less densely populated parts of the country (about 15% of the population) uses a more clustered design which is necessary to create a workable fieldwork task.

Type A - Higher Population Density

Within each BBC/ITV segment, output areas are ordered within the following hierarchy:

- Cable Areas (Yes/No)
- five Reception Areas (Yes/No)
- DTT Area
- Ethnic stratifier

This creates up to 24 sub-strata categories. If a sub-stratum has a population estimate smaller than the sampling interval, it is collapsed into the adjoining stratum. Output areas are then sorted by ACORN code within strata, and selected systematically with probability proportionate to population, using a random start point and fixed interval procedure. Three output areas per assignment are selected, being grouped according to their geographic proximity.

Type B - Lower Population Density

Within each BBC/ITV segment postcode sectors are ordered within the 8 reception sub-strata. They are then sorted within these strata by "wealth indicator" (averaged ACORN code for the constituent output areas) and selected systematically with probability proportionate to population, using a random start point and fixed interval procedure.

Within selected postcode sectors, four output areas per assignment are systematically selected.

b) Selection of addresses

Within selected output areas, addresses from the small user postcode address file are ordered by postcode and a start address is selected at random. Subsequent addresses are selected with a fixed interval of five addresses in Type A assignments and three addresses in Type B assignments. A matched sample of substitute addresses within the same output area is also drawn, for use if the matched primary sample address is ineligible (i.e. no household is found at the address).

The number of addresses issued per assignment varies by BBC/ITV segment, in line with varying response rates. Because this number is not always a multiple of three or four, the number of addresses per output area within assignment also varies. These requirements are updated in line with the latest response rate information.

If two or three households are resident at an issued address, an interview is attempted with each one. If more than three addresses are found, a Kish grid procedure is employed to identify which three households should be approached.

Appendix C

Fieldwork and results

The tables in this report are based on Establishment Survey interviews carried out between October and December 2016

The following table shows the fieldwork results. Data are given for the total sample.

An explanation of some of the terms is given below.

SHOP/BUSINESS

The small user part of the Postcode Addresses File lists delivery points. It includes any business which receives an average of fewer than 20 letters per day. These addresses are ineligible for interview unless there is a private household at the same address.

OTHER NON EFFECTIVE

This category includes all reasons other than those shown in the table for classifying the addresses as non-effective.

SUBSTITUTE ADDRESSES

Ineligible addresses are replaced with substitute addresses - see Appendix B - Selection of addresses.

ADDITIONAL HOUSEHOLDS AT MULTIPLE OCCUPANCY ADDRESSES

Some addresses, such as houses converted into flats, yield more than one household. The procedure at these addresses is described in Appendix H.

NON CONTACT

In these cases the address was believed to be occupied but no reply was obtained from at least 4 calls. At least two of those calls were made in the evening or at a weekend.

REFUSAL

All total and partial refusals by, or on behalf of, either the head of household or 'housewife', or a partner of either of these, are included in this group.

Response Analysis: October - December 2016	
	Total Network
Addresses Issued	21,370
Shop / Business	320
Demolished / Incomplete	27
Empty	1,387
Holiday Home	180
Other Non Effective	395
Eligible Addresses	19,061
Substitute Addresses	2,098
Multiple Occupancy Addresses	240
Total Additional Households	2,338
Total Valid Households	21,523
	100.0%
Non Contacts	2,940
	13.7%
No English Spoken	75
	0.3%
Refusals	5,231
	24.3%
Total Interviews	13,277
	61.7%

Appendix D

Definitions

Population

The “All Households” and “Individuals in all Households” values are based on Office of National Statistics estimates and projections.

Private household

Interviews are only carried out at private households. A private household consists of either one person living alone or a group of people, usually but not always members of one family, who live together and whose food and other household expenses are managed as one unit.

Working TV Set

A TV set is defined as working if it is in working order and is used at least once every six months or if arrangements have been made to repair the set in the next 4 weeks.

TV household

A TV Household is a household which has at least one BARB defined working television set.

Multichannel household

A multichannel household is defined as a household which receives broadcasts from any station other than BBC1, BBC2, ITV, CH4, five, S4C or RTE. It excludes homes which receive only terrestrial stations via cable.

DSAT / DTT / Cable

Reception by digital satellite / digital terrestrial / digital or analogue cable.

BBC areas

These are as defined by BARB at the date of the survey.

ITV areas

These are as defined by BARB at the date of the survey. S4C results are based on homes in the principality of Wales.

Household member

Every individual who lives regularly in a private household address is included as a regular household member.

Household members include:

- a) All relatives living in the household for at least four nights a week.
- b) Married people living away from home most of the week but who return to their spouse at this household for at least one night per week (e.g. at weekends).
- c) Any who are away in hospital or on a business trip at the time of the interview, unless they have been away for more than six months.
- d) Fisherman or armed forces personnel where this is their only permanent address.
- e) Children under 16 years away at boarding school.
- f) Boarders in residence for at least four nights a week unless they are married and return to their own spouse at least one night per week.

Household member (cont)

Household members exclude:

- a) Students, over 16 years away at school, college or university.
- b) Armed forces or merchant navy personnel who are stationed permanently away from home.
- c) Lodgers from separate households as they cater for themselves (whereas boarders have at least one meal provided by the housewife).

Housewife or Houseperson

The housewife is the member of the household who is solely or mainly responsible for the household duties.

- a) There is one and only one housewife in a household
- b) A housewife may be male or female
- c) If two people of different sex share the household duties the woman is regarded as the housewife
- d) If two people of the same sex claim shared responsibility, the elder is taken as the housewife
- e) Paid domestic help is never the housewife.

Head of household

The Head of the Household is the member of the household who meets one or more of the following requirements:

- a) Owns the property.
- b) Is legally responsible for the rent of the accommodation.
- c) Has the use of the accommodation because of the job.
- d) Is related to the owner or tenant who is not a regular member of the household. For example the wife of a member of the armed forces who is permanently posted away from home will be the Head of the Household.

Joint responsibility for head of household can be claimed between a couple who share ownership, however in such cases a single head of household will be defined based on sex (the male will be taken in a mixed-sex couple) and age, with the eldest being taken.

Social Grading

The social grade of a household is determined by the occupation of the Chief Income Earner.

Chief income earner

The Chief Income Earner is the member of the household with the greatest total income, whether from employment, pensions, state benefits, investments or any other sources.

Screen size

The size of the television screen is measured diagonally across the screen.

Employment status

In the report tables, working F/T is defined as those working 30 or more hours per week while working P/T is defined as those working between 8 and 29 hours per week (the working category in the projected tables include those working 8 or more hours per week). Adults and housewives working less than 8 hours per week or in full time education are included in the "not working" groups.

Appendix E

Number of televisions in the household

The Establishment Survey report provides data for only those sets which are working or temporarily out of order.

Any set “permanently out of order” has been deducted from the number of sets in a household. Thus, if a household has two sets and one of the two is “permanently out of order”, it has been treated as a single set household in the tables. Similarly, if a household has only one set, which is “permanently out of order”, it is shown as a “No TV” household.

Appendix F

Rounding

The values shown in the tables in this report are those obtained from the weighted sample data rounded to the nearest thousand. The effect of this is that in some instances the component parts in a table may not sum exactly to the total and, similarly, values in the one table may not sum to a value in another table (e.g. men + women might not equal adults).

Appendix G

Sample bases for the tables

The following table gives the unweighted sample bases for the main report tables. They are an aggregation of all fieldwork from October to December 2016

	All Households	Total TV Households
All Households	13277	12757
All Sets	26276	26276
All Individuals	32898	31772
Children 0-15	6351	6191
All Adults	26547	25581
Adult Males	12923	12415
Adult Females	13624	13166

Appendix H

Multiple households at issued addresses

Establishment Survey interviewers are issued with a set of pre-selected addresses to which all interviewing is restricted. It is possible for more than one household to exist resident at a single address, however, therefore after checking the address with a responsible adult, the interviewer first determines the number of households living at the address.

In the small proportion where the answer is two or more, special procedures apply.

If the number of households is two or three, the interviewer attempts to interview each of the households.

If there are four or more households at the address the interviewer lists the details of the households in a Kish grid. This procedure provides random selections determining the three households that the interviewer should attempt to interview.

The procedure at the additional households is as for any other interview. The total of these additional households by area and overall are shown in the fieldwork response analysis given in Appendix C.

Appendix I

Weighting

Quarterly Establishment Survey data are weighted using a rim weighting technique to control for the following:

Household size (1 and 2+) by geographical segment (48 in total)

Sex by age profiles for each standard region

The age profiles used break down into the following groups:

0-4, 5-9, 10-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65+

Population targets for these rims are derived from census data, ONS and Department of Environment projections

H50 Thank you for taking part in this interview. Would you be willing to be re-contacted on behalf of BARB in the next 12 months? This would be regarding your TV viewing and there would be no obligation for you to take part. The contact would be from a research company working on behalf of BARB. SP
 Yes
 No

ES ONLY NOT ESR**ASK IF H50 = NO AND HH NOT CHOSEN FOR RECRUITMENT**

H118 Thank you. SP
 BARB also provides the TV industry with the official TV viewing figures. Sometimes called the TV ratings. This is done by Kantar Media using data collected from a small number of homes which are specially chosen to represent all TV viewing in the UK.
 We understand that you would prefer not to be recontacted for future research generally and we will not do this but, if selected to be a panel home, would you be interested in this? If you think you might be interested, you would be under no obligation to take part.
 Yes
 No

<i>If selected for recruitment GO TO R2</i> <i>ELSE: exit recruitment - thank and close</i>		
ASK ALL IF SELECTED FOR RECRUITMENT		
R2	Thank you very much for answering all of my questions so far.	
intro		
ES ONLY NOT ESR		
From the answers you have given to me today I'd like to ask if your household would consider joining BARB's TV viewing panel.		
ASK ALL IF SELECTED FOR RECRUITMENT		
R2	BARB provides audience figures to TV broadcasters in order to give people like you the kind of programmes you want to watch. To help them they need to know how many people watch in general, what programmes and channels they watch and when they watch. They do this with a panel of homes around the country which represent a range of different ages and backgrounds. The task is simple and each household member would receive regular rewards for taking part. I'd like to explain a bit more about the panel and what's involved and then ask if your household would be interested in joining. This will take another 10 minutes or so but you will be under no obligation to say yes at the end of it. Is it okay to continue? Yes No - not interested (exit recruitment)	SP
ASK IF YES AT R2		
R3	I'm going to show you a short film which explains what you would need to do. I can then answer any questions you might have. INTERVIEWER NOTE: IF REQUIRED EXPLAIN THAT IT IS BEST FOR ALL HH MEMBERS PRESENT TO HEAR THE EXPLANATION OF THE PANEL REQUIREMENTS SHOW VIDEO Confirm video and leaflets shown Yes No (exit recruitment)	SP

ASK IF YES AT R3		
R4	INTERVIEWER: EXPLAIN REQUIREMENTS OF THE PANEL (INCLUDE THE FOLLOWING)	SP
intro	There are a few points that I would like to highlight from the video you have just seen: - It is important to remember that it doesn't matter how much or how little television you watch. It is just as important for us to know how little people watch as well as how much - All household members must be committed to taking part (registering when in the room) - All television sets in your home will need to be measured and all computers (including laptops and tablets) that are capable of connecting to the internet will need to be measured - This will include any Television sets, computers or tablets you acquire in the future while taking part - There are rewards for taking part Is there anything else that you would like me to explain in more detail?	
R4	Would you be willing to help us by becoming a BARB panel home Yes No (exit recruitment)	SP

ASK IF WILLING AT R4		
R5	That's great.	
intro	In that case I need to collect some more details about you and your household. After that I will give you some more details about the next steps that we need to follow. IF 1 PERSON HH I'd like to start by asking a few more questions about you... IF 2+ PERSON HH I'd like to start by asking a few more questions about each of the people in your household. This will be in the same order as before and start with you.
